World's First Automatic Grill-Cleaning Robot to Debut New Bluetooth-enabled Grillbot Pro at CES

New Grillbot Pro Unveiled at World-Famous Consumer Electronics Show

LAS VEGAS - January 5, 2017 — Award-winning Grillbot, the world's first automatic grill-cleaning robot, will debut a new product at the Consumer Electronics Show (CES) in Las Vegas, Nevada, this week. The new Grillbot Pro will feature Bluetooth 4.0 connectivity enabling the control of certain functions from a smartphone, and a replaceable cleaning cartridge that makes the new Grillbot Pro even more effective at getting rid of grease and grime on the grill.

CES is the world's gathering place for all who thrive on the business of consumer technologies. It has served as the proving ground for innovators and breakthrough technologies for more than 40 years—the global stage where next-generation innovations are introduced to the marketplace.

Grillbot was created to enrich lives by simplifying them and by taking the grunt work out of cleaning grills through the brains and brawn of robotics. It is an innovative, fully-automated device that makes grill cleaning super easy with a push of a button. Designed for use on any style grill, consumers simply place the Grillbot on their grill and the Grillbot does all the cleaning — saving grillers time from the grime. The device is driven by a powerful CPU that controls movement, speed, and direction of the brushes. The Grillbot comes with an LCD alarm and timer that can be set for a light scrub, deep clean or something in between.

This brand new Grillbot Pro design comes with the same great features as the original, plus the addition of Bluetooth 4.0 technology and a replaceable cleaning cartridge. These features represent the next generation of this technologically advanced product and are designed to give BBQ chefs more freedom and leisure time to watch games, relax with family or cater to guests by controlling certain Grillbot functions from their smartphone without even having to go outside. The person on BBQ duty will never have to miss a shot, goal or score again as the Grillbot easily and effectively handles the dirty work - no mess or fuss required at all.

The easy-to-use Grillbot Pro will deliver the hands-free cleaning experience that the original Grillbot provides, as well as the following new features:

- **Bluetooth 4.0 technology and smartphone app** — Allows control of certain functions from a smartphone while away from the grill
 - **Automated on/off function** – Use your smartphone to control the on/off function on the built-in cleaning spray cycle
 - **Illuminated alarm and timer** — Stay aware of how much cleaning time remains and receive an alert on your phone when the cleaning cycle is finished

- **Heat alarm** — Sounds off a lifesaver alert if you forget to turn off the flames
- **Brush Replacement Reminder** —The brushes are easy to remove and dishwasher safe, and your phone will remind you when it's time to replace them
- **Replaceable cleaning cartridge-** easily and effectively loosens up even the toughest grease and grime on the grill, enabling a better clean

Grillbot will be demonstrating its new and improved Grillbot Pro along with its original Grillbot and accessories at the Grillbot Booth #42469 SANDS at CES. The Grillbot Pro is expected to be available by Summer 2017.

Grillbot has won multiple global accolades. It ranked #13 in the Wellbots Top 25 Smart Products list in the U.S. and in 2015, Grillbot was one of Oprah's "O" list top picks. Grillbot also won the 2012 "Innovation Award" from the International Home and Housewares Show, the National Hardware Show's Gold Award for Design, and SkyMall's Top Pick Award.

Grillbot has already sold over 100,000 units globally, including new markets such as Russia, Australia, Canada and Brazil.

About Grillbot

As with most inventions, Grillbot began with an idea. One day, founder Ethan Woods was getting ready to use his grill and did not have a brush available to clean it. While trying to clean a stubborn grill with a wire brush, he wondered if a robot could be created to do the job. He took a power drill, attached a brush and cleaned the grill. He put together a design team and that makeshift drill became the sophisticated computer-driven Grillbot! Since then, Grillbot has sold over 100,000 units and has received many awards and accolades for its innovative design.

On/Off control

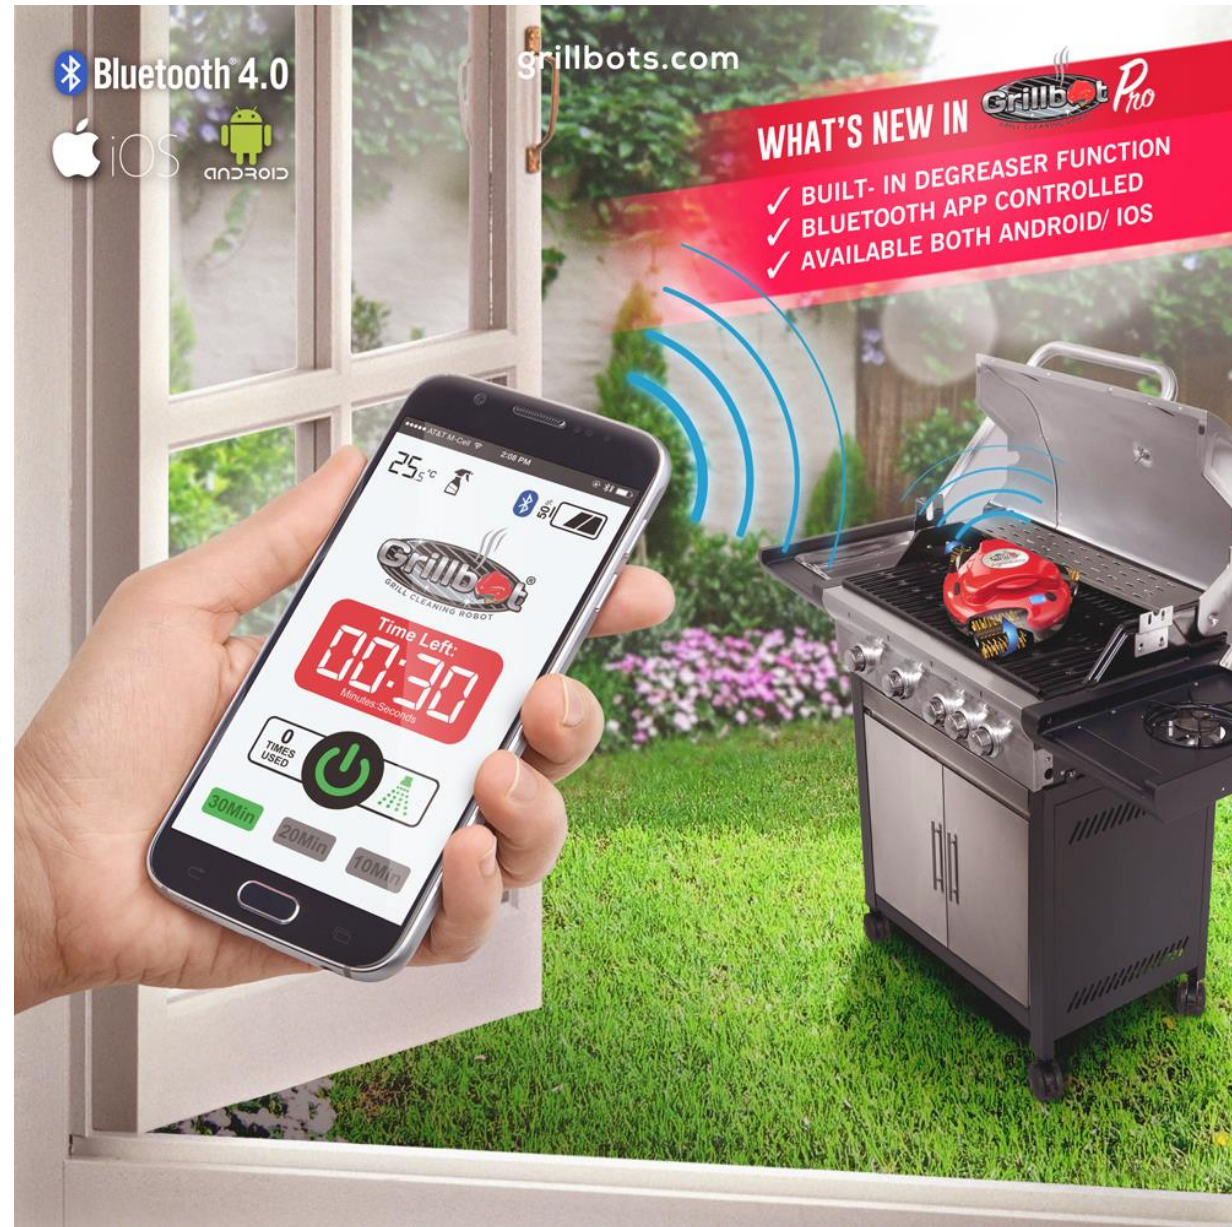

Timer function

High heat alert

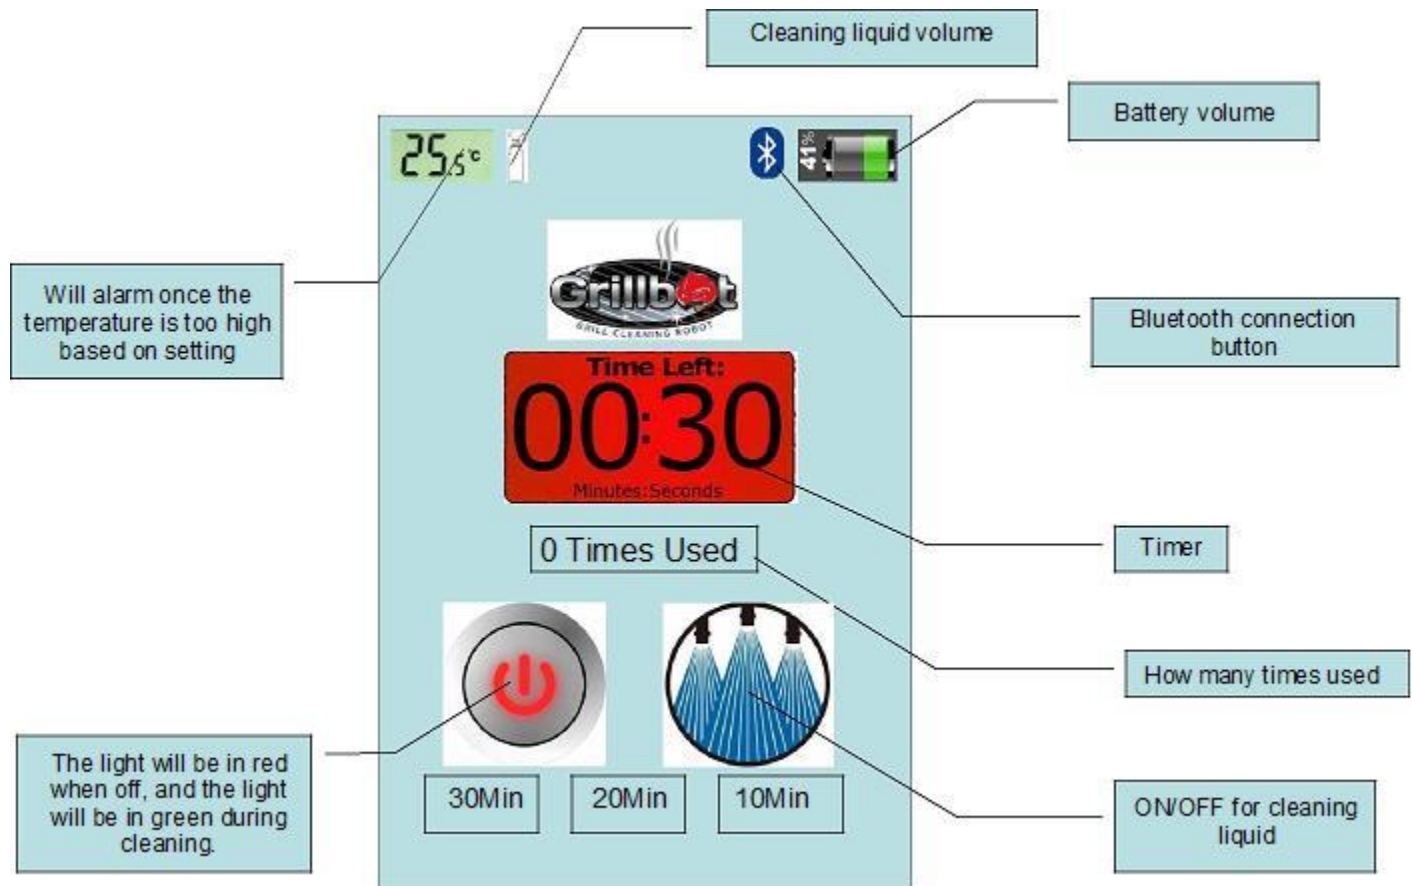

Built-in degreaser control

Brush replacement alert

Battery strength indicator

Grillbot *Pro* App Design

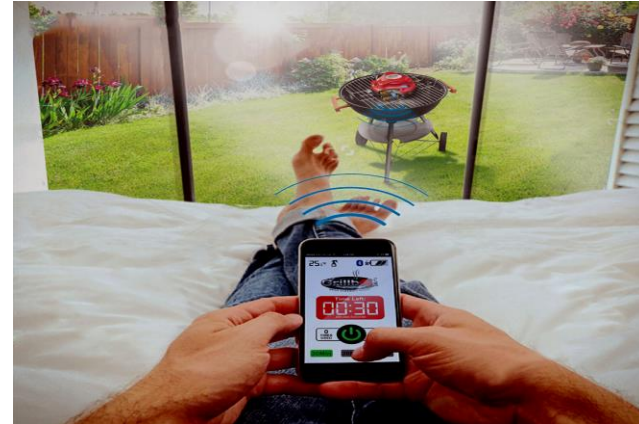

The Grillbot *Pro* App Part of Your Life

Spend more time with family

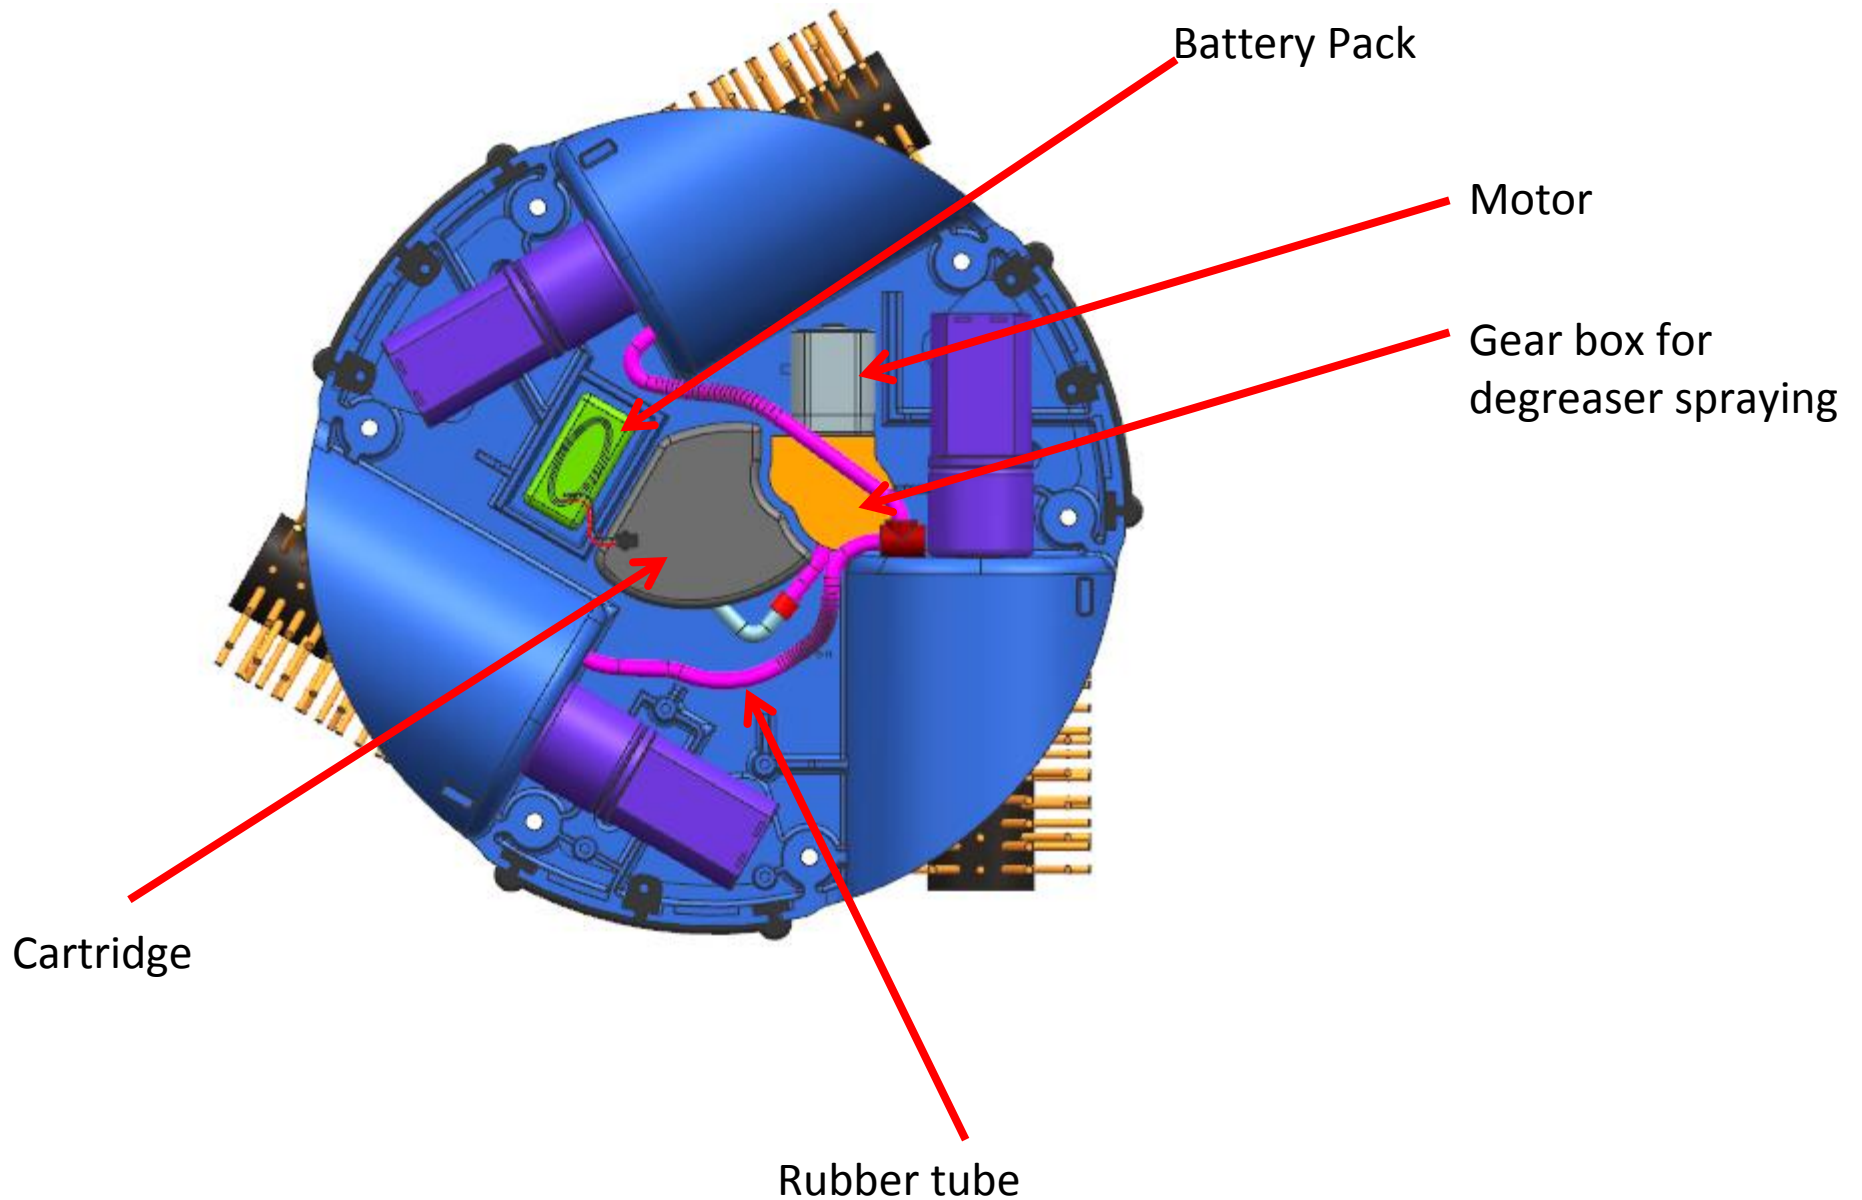

Or just relaxing

And don't miss a moment of the big game

Grillbot *Pro*

Grillbot Brushes

Each griller has their own style why should cleaning be any different?

BRASS - gentle enough that it won't scratch most grills.

Brass brushes are important if you have a stainless steel or porcelain grill. Brass is a softer metal and won't scratch the surface, helping keep you grill looking great..

STAINLESS STEEL - our strongest option for a deep robust clean.

Stainless steel brushes are great for cast iron or expanded steel grills. Cast iron is by far the best outdoor cooking surface because it holds heat better than other kinds of grills. However, these kinds of grills are higher maintenance. The bristles of steel brushes are able to better penetrate the tiny pores in the cast iron. This allows for a much better cleaning experience.

NYLON - softer for coated grill grates, non-scratch.

Introducing the new Nylon brushes. The Nylon brush is softer than the Brass and Stainless Steel brushes (may require longer cleaning cycles). The Nylon brushes won't scratch the surface and works on all types of grill grates helping keep your grill looking great.

Grillbot Carry Case

The Grillbot carry case provides protection & mobility

Features of the Grillbot Carry Case

- Grillbot can be charged while in carry case
- Weather Resistant
- Dishwasher Safe
- Multiple storage options:
 - Hook it to your grill
 - Lay it flat
 - Stand it upright using built in legs
