

Parallax 3D Models Library

Parallax 3D Models are typically available in both STEP and VRML formats.

STEP

- Rendered with simplified objects, without text layers.
- Ideal for mechanical use.
- File size can be reasonably small.
- Saved with file extension .step

VRML

- Rendered with maximum detail, including silk text and graphics layers.
 - Good for visual applications.
 - File size can be very large.
 - Saved with file extension .wrl
 - Export unit setting is millimeters.
-

Making use of the 3D Models

The Parallax 3D Models use standard 3D file formats, and should be viewable with your favourite 3D CAD software!

For a quick start, download FreeCAD here : <https://www.freecadweb.org/>

If you need a 3D Model that you can't find here, please let us know at support@parallax.com
