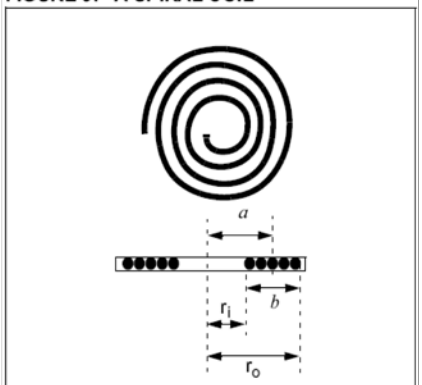
INDUCTANCE OF SPIRAL WOUND COIL WITH SINGLE LAYER

The inductance of a spiral inductor is calculated by:

EQUATION 25:

$$L = \frac{(0.3937)(aN)^2}{8a + 11b} \quad (\mu H)$$

FIGURE 9: A SPIRAL COIL



where:

$a = (r_i + r_o)/2$

$b = r_o - r_i$

r_i = Inner radius of the spiral

r_o = Outer radius of the spiral

Note: All dimensions are in cm
