

Functional and Affordable

The Polaris Touch provides added accessibility by increasing the number of serving lines available for students. Its user-friendly operation allows cashiers to move students through the line more quickly, serving more students in a shorter time frame. The Polaris Touch's fast food-style membrane keyboard is specifically designed for busy K-12 cafeteria environment. With no raised keys and a spill-proof casing, the Polaris Touch is durable and easy to clean. Best of all, the Polaris Touch is affordable for almost any budget, providing you with a low-cost option for a significant return on your investment
