Propeller Protoboard USB Power Hack

WARNING
Modifications at your own risk!!!

|	
1/ Identify the USB +5 V via and the Protoboard +5 V hole. 	2/ Solder a 2-way header to the Protoboard +5 V hole.
3/ Carefully scrape the solder resist from the USB +5 V via and solder a fine wire link between the USB +5 V via and the bottom pin of the header. 	4/ Fit a jumper to connect USB +5 V to Protoboard +5 V **Job done**!
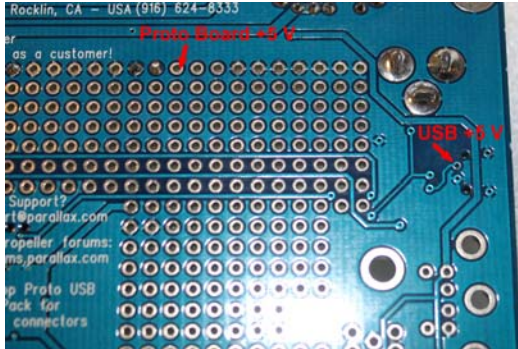

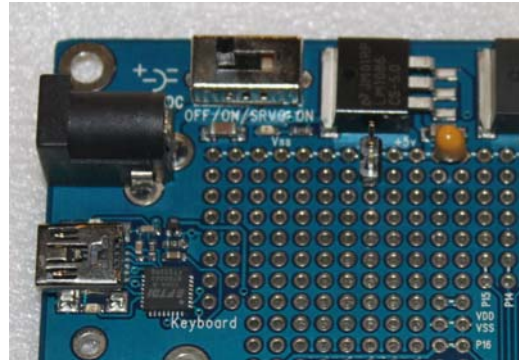

Remember to remove the jumper when the Protoboard is not powered from USB!
