Plug in propscope and watch driver install and get this
status

Your device is ready to use
Device driver software installed successfully.

PropScope dies at this point

Cursor   Measure

Attempt to run propscope from icon on desktop resulted in no indicated acivity.
Smells like it thinks there is a copy in memory and refuses to run multiple copies game.
I got rid of the above version using task manager and it does not show any running version at this Time.

REBOOT

Proscope worked this time

PropScope v1.0.3:propscope
